SUMMARY

Product designer with 5+ years designing complex B2B workflows, AI interfaces and data-dense enterprise tools, from research and information architecture through to shipped UI. I've led design on assessment, decision-making and planning products, mentored junior designers, and shipped a voice and text AI assistant. An engineering background means I design with real constraints in mind, so work moves from prototype to production with fewer surprises.

EXPERIENCE

Product Designer II · MATC Group — **Mar 2024 – Apr 2026**

- Led end-to-end design of a B2B assessment platform, replacing a client's spreadsheet and email process with one structured workflow and cutting manual effort by **30%**.
- Owned design of the Decision Hub, replacing spreadsheets, email, meetings and decks with one executive workspace, and set its priority model: risk alerts first, approvals next, reporting last.
- Built the team's design system in Figma with engineering, including tokens, components and state patterns that made multi-step workflows clearer and sped up handoff.
- Worked with product stakeholders and engineering leads to agree requirements and trade-offs, taking work from user flows and prototypes to production-ready UI.
- Mentored junior designers, assigning work and reviewing designs for consistency and quality.

Product Designer, Part-time · EmendoAI — **Jun 2025 – Oct 2025**

- Coordinated design work across a team of three product designers, assigning tasks and presenting the team's work to stakeholders. Co-designed two AI agents, one for project operations and one for finance.
- Designed and shipped Ask Me Anything, a multimodal voice and text AI assistant with haptic feedback, cutting project setup time by **50%** with text and **80%** with voice.
- Helped define the assistant's core flows across voice, text and touch, from first request to completed action.
- Redesigned subscription and onboarding around clearer feature groups, and audited competitors' cancellation flows to uncover churn risks.

Boston University — **Feb 2019 – Jan 2024**

> UX Designer — **Feb 2021 – Jan 2024**
>
> - Owned UX and interaction design for degree planning products used by 2,000+ students and advisors every semester, turning complex degree requirements into clear semester-by-semester plans.
> - Redesigned Degree Map's interaction model with auto-save, drag-and-drop validation and clear semester states, so the product explains its own rules instead of relying on documentation.
> - Cut bug reports by **80%** by turning advisor feedback, support requests and direct observation into design fixes. Other departments asked for access within three months, with no formal rollout.
> - Improved accessibility by adding icons and text labels to key states and feedback, so critical information never depends on color alone.

> Web Developer — **Feb 2019 – Jan 2021**
>
> - Developed Degree Map and contributed to its early design, and designed and built the Course Sequencing Tool with stakeholders and developers.

Web Developer · SME MaXX — **Jul 2016 – Jul 2017**

- Built a customized cashback platform with product management.

UX Designer/Developer · Freelance — **Jun 2015 – Jun 2016**

- Designed and built a patient monitoring system for a private clinic, replacing an error-prone spreadsheet process and cutting billing time by **60%**.

EDUCATION

M.S. Computer Science · University of Massachusetts Dartmouth — **Sep 2017 – May 2019**

B.E. Computer Engineering · Don Bosco Institute of Technology, Mumbai — **Jun 2011 – May 2015**

SKILLS

Product & UX Design: Product Design, Interaction Design, Information Architecture, Design Systems, Prototyping, User Research, Usability Testing, AI and Voice Interfaces, Accessibility, User Flows, Wireframing, Product Strategy, Responsive Design, Visual Design, Stakeholder Collaboration, Design-to-Development Handoff

Design & AI Tools: Figma, Figma Make, Miro, Adobe Photoshop, Claude, ChatGPT, Stitch

Collaboration & Delivery: Notion, Confluence, Asana, Slack, Agile/Scrum

Frontend Knowledge: HTML5, CSS3, JavaScript, React, TypeScript, Tailwind CSS, Bootstrap
